

Ellipsis Quintet is a **prog-world-jazz** project by **Vasileios Nalmpantis**, consisting of five multi-talented, creative musicians with very different cultural backgrounds, who have already developed their own style and perhaps even their own sub-genre on their debut album "**Avoid The Void**". Metal, jazz, prog, fusion and much more, with traditional and folk music from all parts of the Balkans and the Eastern Mediterranean as a common denominator, unite to form an amalgam of sounds and emotions that transcends forms and boundaries. With their second album "**Aristotle's Dilemma**" they raise the bar even higher in terms of artistic, creative and production quality. They are not guided by short-lived trends, but concentrate on music that remains true to a pure artistic vision and stands the test of time.
